

Description:	Condensation product of naphthalene sulphonic acid.
Aspect:	Brown thin powder.
Concentration:	Min. 90%
pH (sol. 10%):	7,0 – 9,0
Charge:	Anionic.
Application:	Dispersing agent.
Properties:	<p>The UNISYNT® ATX is compatible with all conventional anionic retanning agents, dyes and fat liquors. UNISYNT® ATX is mainly used to level the shade of leathers dyed with anionic dyes. It accelerates the dye absorption into the chrome-tanned leather fibers. Other effect is the distribution of the dyes is more evenly on the surface. UNISYNT® ATX has excellent light fastness, and it is resistant to yellowing at elevated temperatures.</p> <p>UNISYNT® ATX improves the softness of white leathers, in particular the softness of the grain, if it is applied at the neutralization stage.</p> <p>When used in the vegetable tanning, the UNISYNT® ATX accelerates the penetration of the tanning agents. Because of this, less time is required for tanning, resulting in more evenly colors and uniform distribution of the tannins into the leather.</p>
Use guideline:	<p>We would recommend applying UNISYNT® ATX in the dosage according the desired article:</p> <ul style="list-style-type: none"> Vegetable tanning: 1,5 a 3,5% over the limed weight; Chrome retanning: 1,5 a 5,0% over the shaved weight; Dyeing: 0,5 a 4,0% over the shaved weight.
Storage:	<p>We recommend keeping the product sealed in the original package, in a clean and controlled environment, avoiding extreme temperatures.</p> 
Package:	25 Kg plastic bags on 1.000 Kg pallets.
